Fund Manager Comments

Global economic growth has remained resilient over recent years despite the impact of lower global trade, lower productivity, higher interest rates and the cost of living crises. A driver of this resilience has been the services activity which has outperformed manufacturing. Looking ahead we are expecting the combination of lower inflation and interest rates over the next 24 months and the cost of living crises subsiding to support stronger economic growth. Productivity is also expected to improve but the geo political pressure will continue to constrain global trade. Inflation is peaking globally and as interest rates decline and economic growth improves we expect asset, equity and property values to increase. Factors that could boost global growth are: 1) Start of global interest rate cut cycle; 2) Lower energy prices; 3) Renewed fiscal policy support for infrastructure development and reindustrialisation 4) Cessation of war in the Middle East and Ukraine; and 5) Technology led improvement in productivity. Factors that could constrain global growth are: 1) Escalation of war in the Middle East and Ukraine 2) Renewed cost push inflation (eg. higher global oil prices) 3) Disorderly unwind of Chinese property market; 4) Significant unwinding of housing markets; and 5) Disruption from technology on labour markets, especially AI.

Inflation is peaking globally and as interest rates decline and economic growth improves we expect asset and property values to increase. The lower development activity due to lower liquidity and the availability of bank funding over the recent monetary tightening cycle has also curtailed new property supply which creates an improving environment for existing property owners. Global REITs with strong management teams and superior balance sheets are well positioned to outperform in the current environment. Your fund is well diversified with high exposure to sectors that benefit from the 4th Industrial Revolution and positive secular drivers including Logistics, Datacenters, Storage and Healthcare.
